

Prof. Viktor Kožich, M.D., Ph.D.

Professor Kožich graduated from the School of General Medicine, Charles University in Prague in 1985. Since his graduation he has been working in the Institute of Inherited Metabolic Diseases and he specialized in clinical biochemistry and medical genetics, in 2012 he became the full Professor of Medical Genetics.

His main interests are genetic, biochemical, clinical, epidemiological and ethical aspects of inherited metabolic disorders with a special interest in disorders of homocysteine metabolism and namely in cystathionine beta-synthase deficiency—a disease in which he became interested in 1991-1992 during his fellowship in the laboratory of Prof. Jan P. Kraus (University of Colorado School of Medicine in Denver, USA). Prof. Kožich is also involved in organization of neonatal screening and serves as a Chairman of the national Coordination Center on Neonatal Screening in the Czech Republic.

Professor Kožich has been a tutor of graduate and postgraduate students, he is an author of over 100 publications in peer reviewed international journals, several chapters in books, and of articles and chapters in Czech medical literature; he has been an invited speaker at various international and national conferences. He is a member of councils of several international learned societies (SSIEM, ERNDIM, and ESHG) and he is active in peer review system at both the national and international levels.
